DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Group I, Claims 1-15, 17-28 and 30-33, drawn to a system for selecting, converting and loading information for accessing theme data.
 - II. Group II, Claims 16 and 29, drawn to a method for applying and creating the theme based on conversion from a text data file, wherein applications are responsible for creating the themes by manipulation of a binary file.
 - III. Group III, Claims 34-47, drawn to a method for using data structures containing theme data sections, wherein manipulation within this data structure allows for theme data to be accessed and applied.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has a separate utility for using a text data file to be converted to a binary file format, and wherein applications are involved in applying theme information and invention III has a separate utility for using data structures and manipulation of data structures in the form of binary data for determining and accessing theme changes. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and because the

search required for Groups I-II, vary based on each group, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
